

MindReader

Installation guide

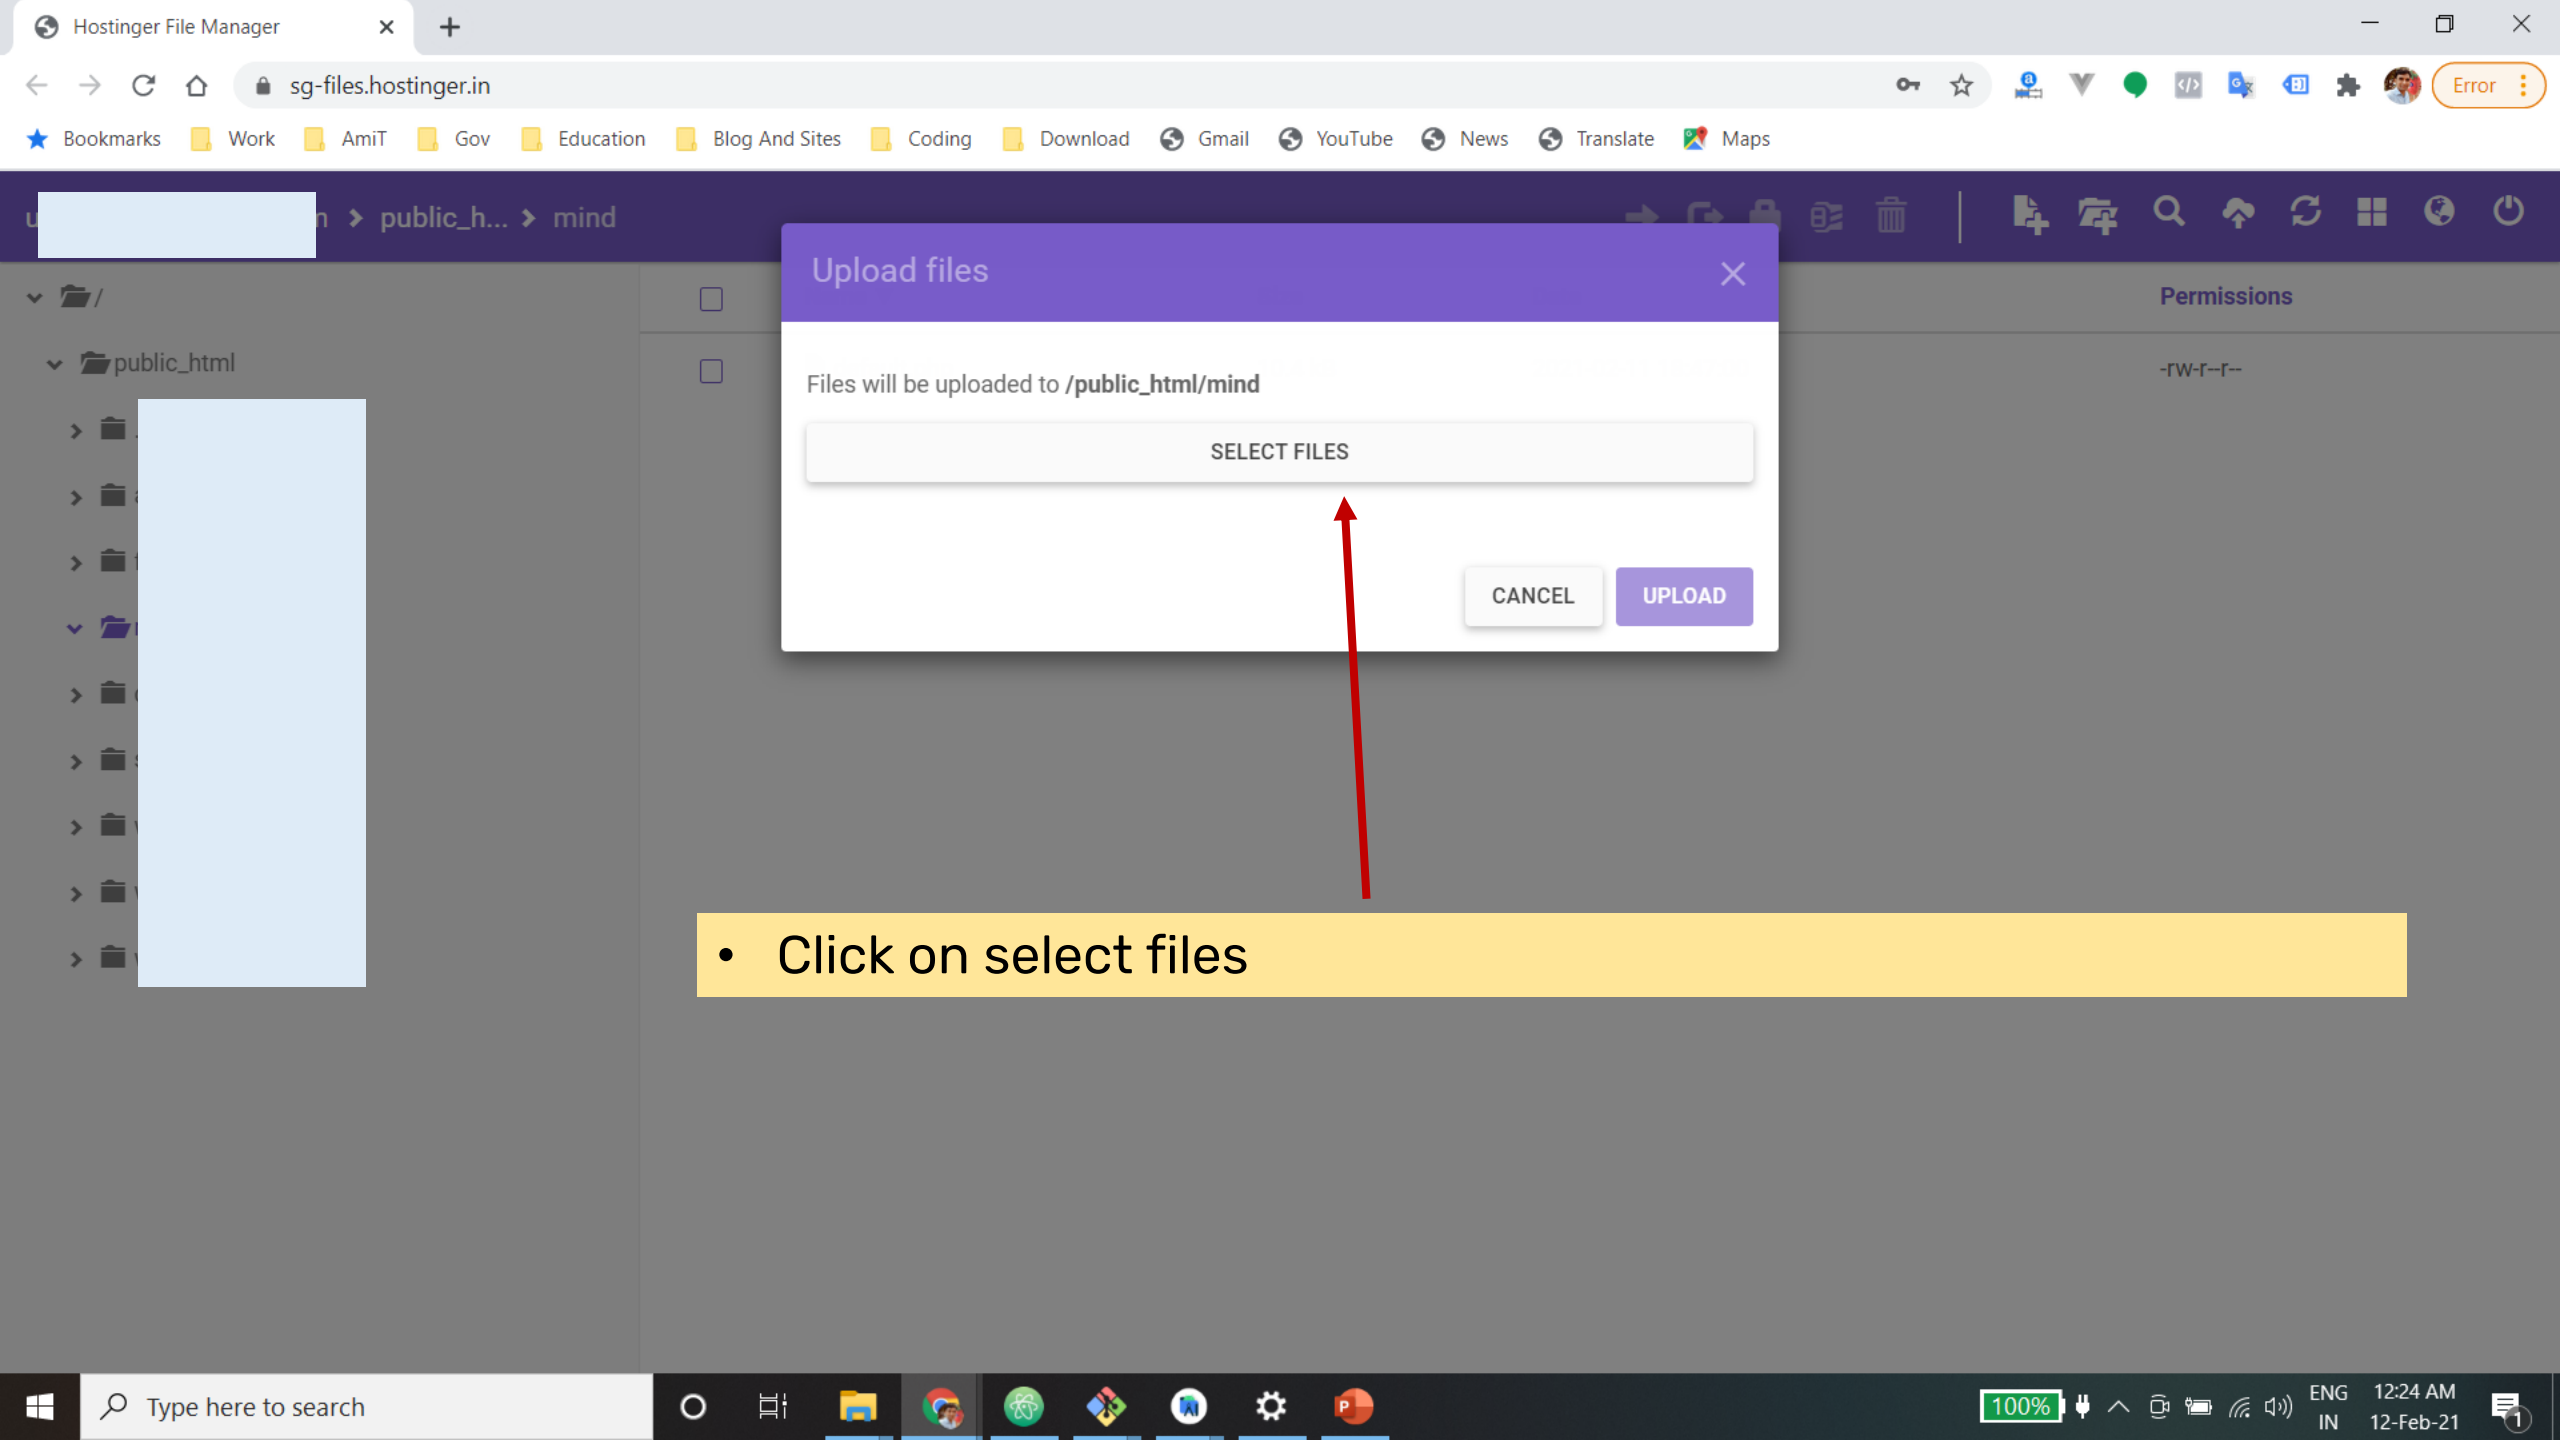

- Open your CPanel (In my case I am using Hostinger)
- You need to have domain pointed to some directory. (In my case I have pointed subdomain)
- Open that directory, where you want to upload project.

- Click on upload button

Upload files

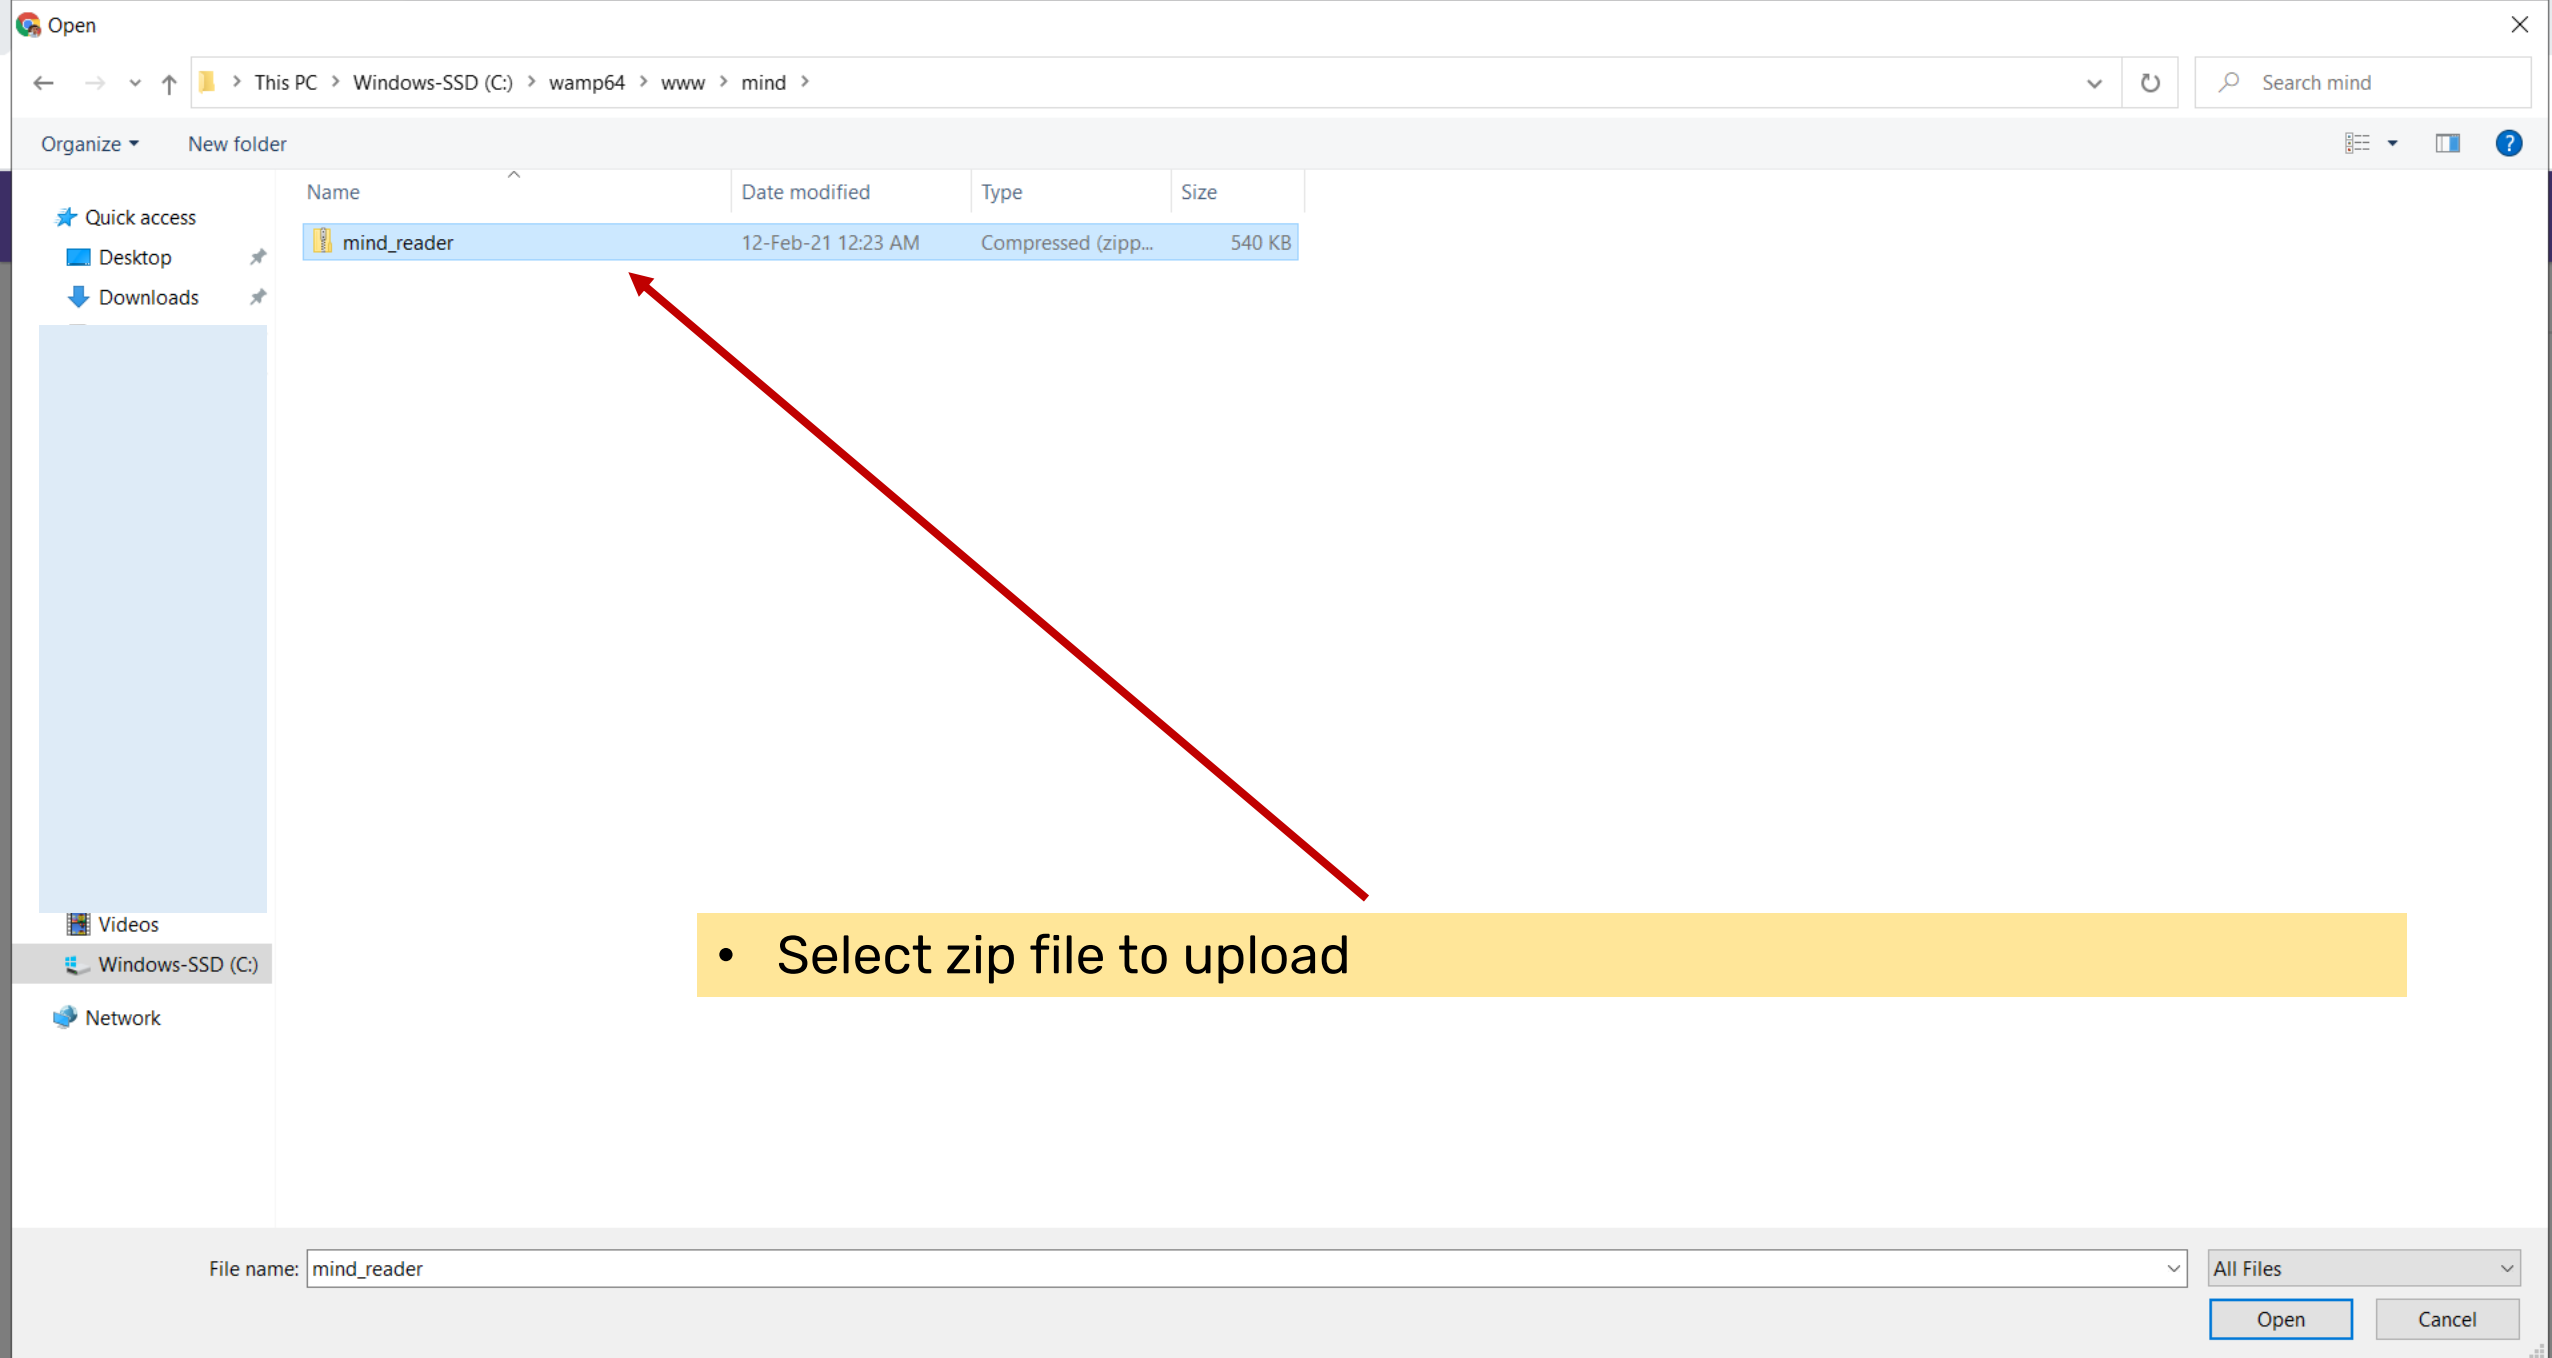

Files will be uploaded to `/public_html/mind`

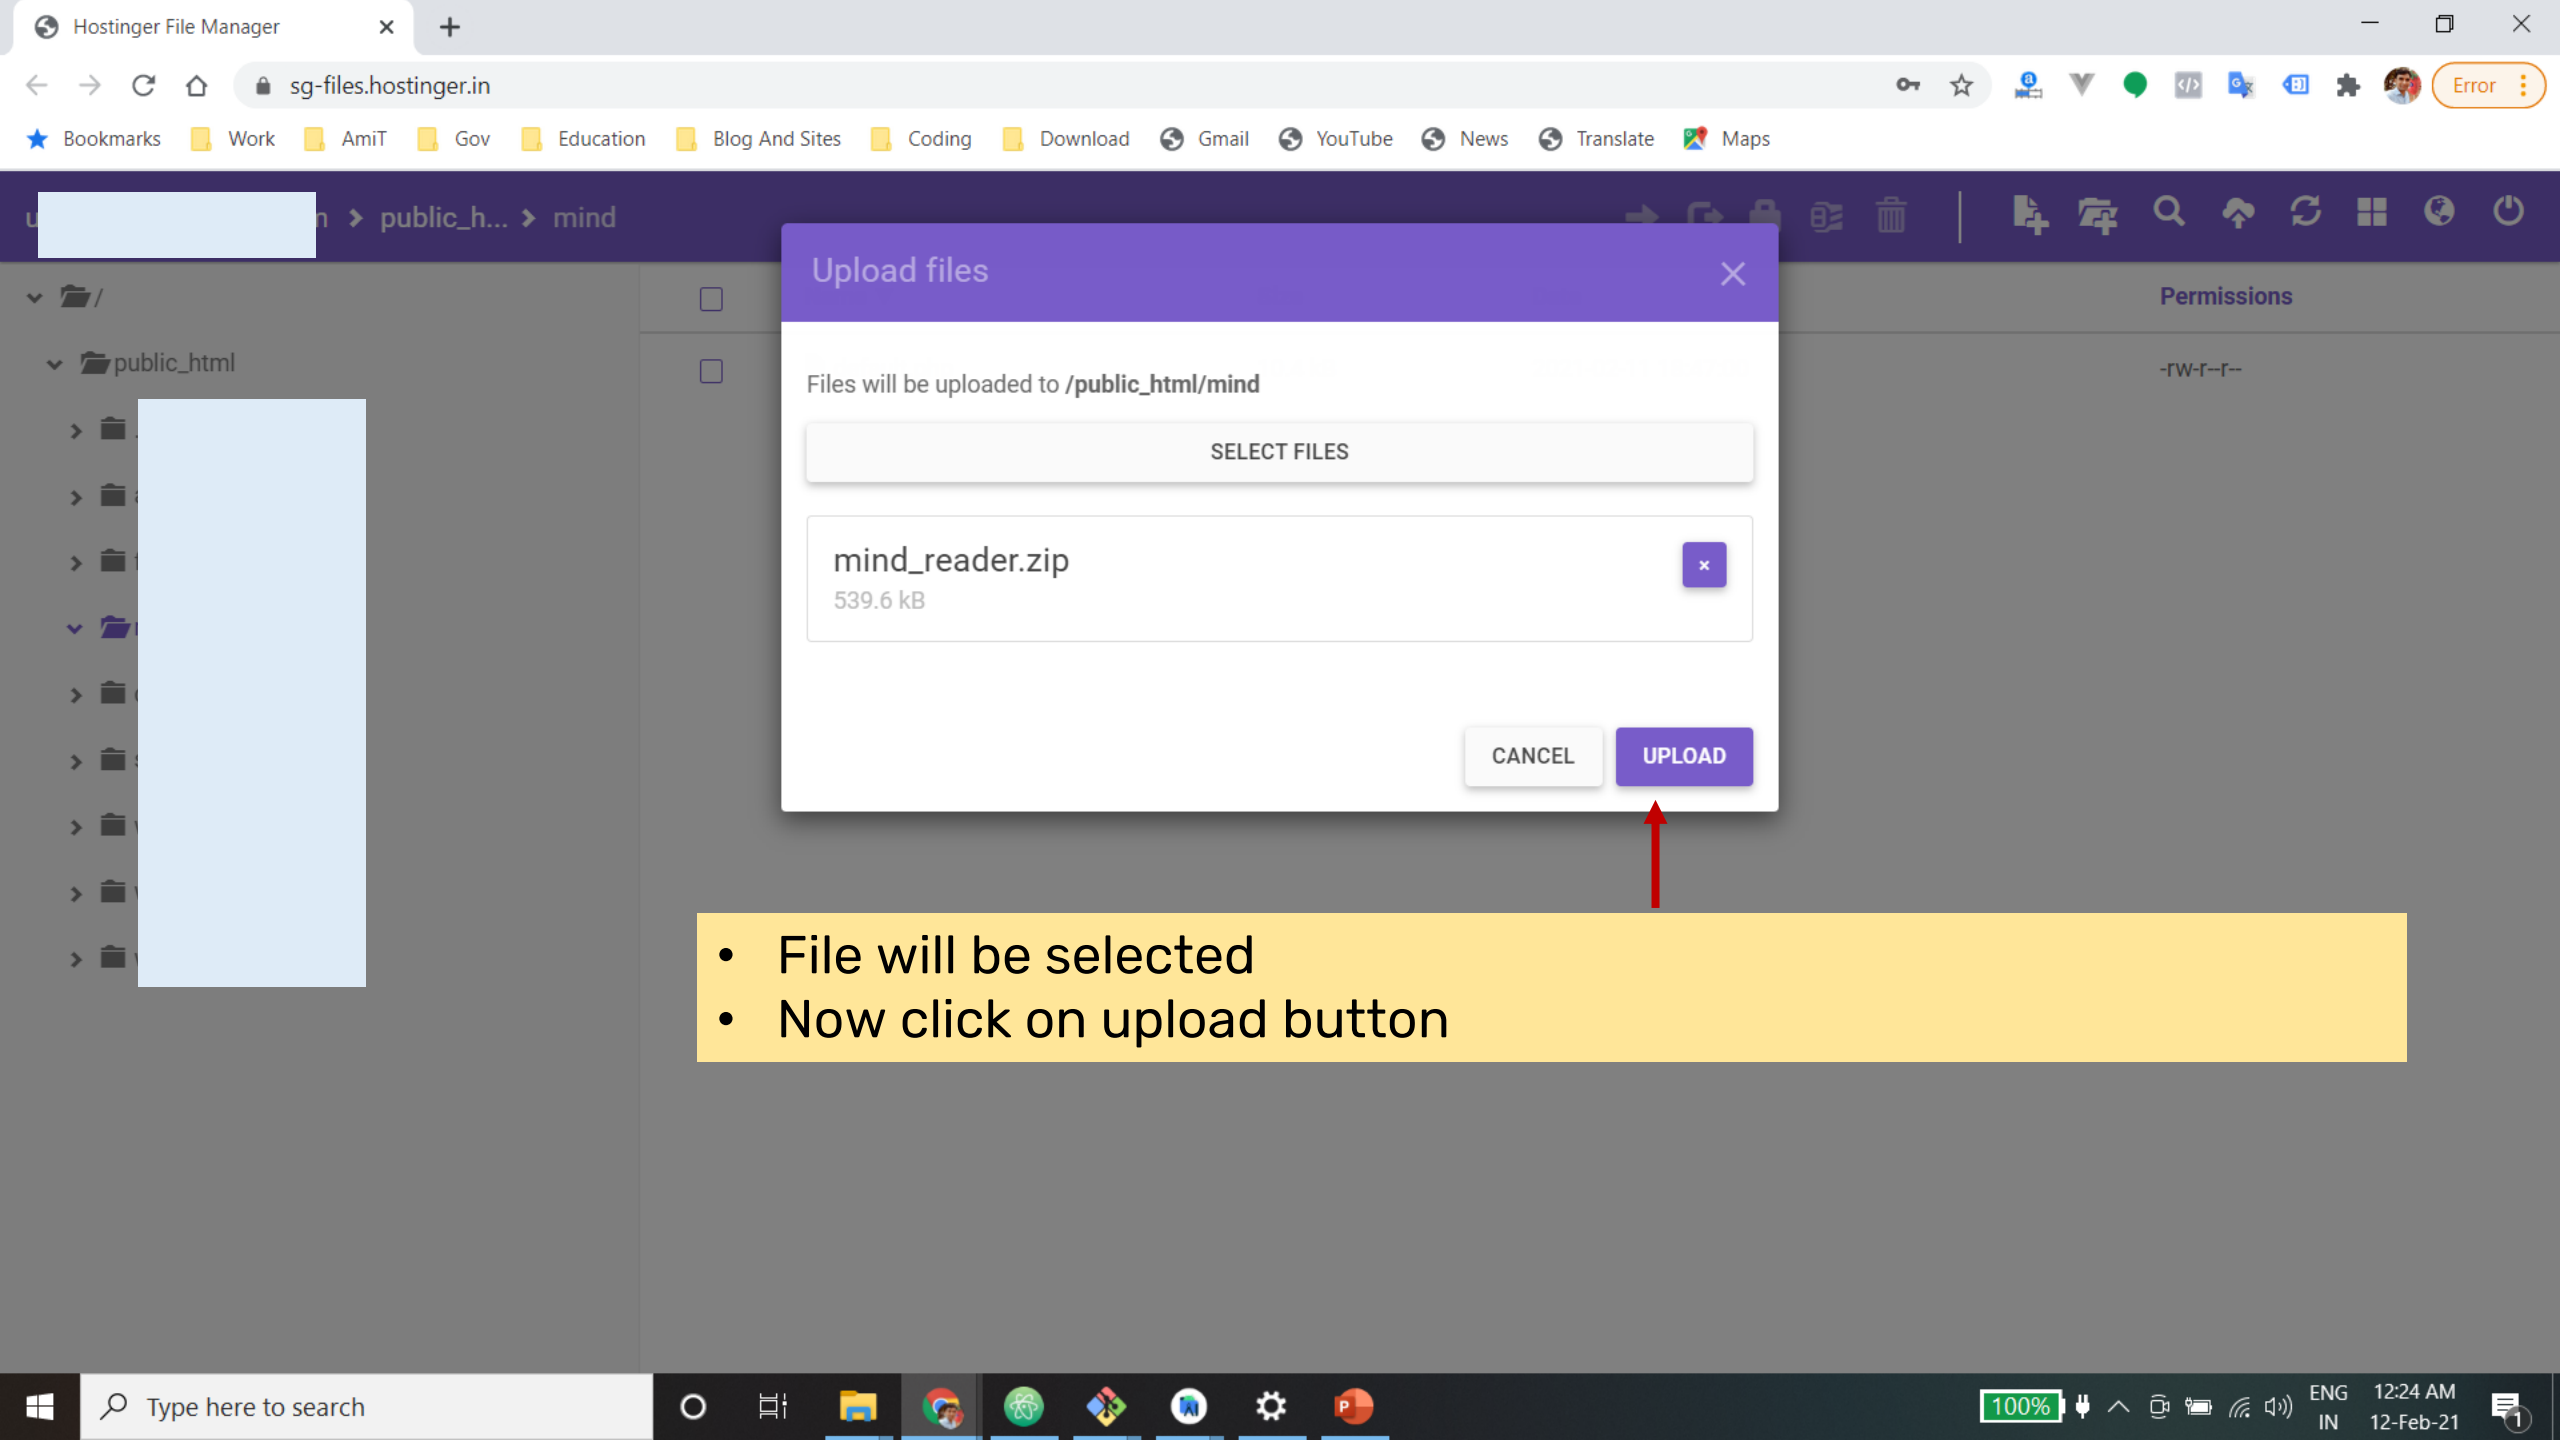

SELECT FILES

CANCEL

UPLOAD

- Click on select files

Upload files

Files will be uploaded to `/public_html/mind`

SELECT FILES

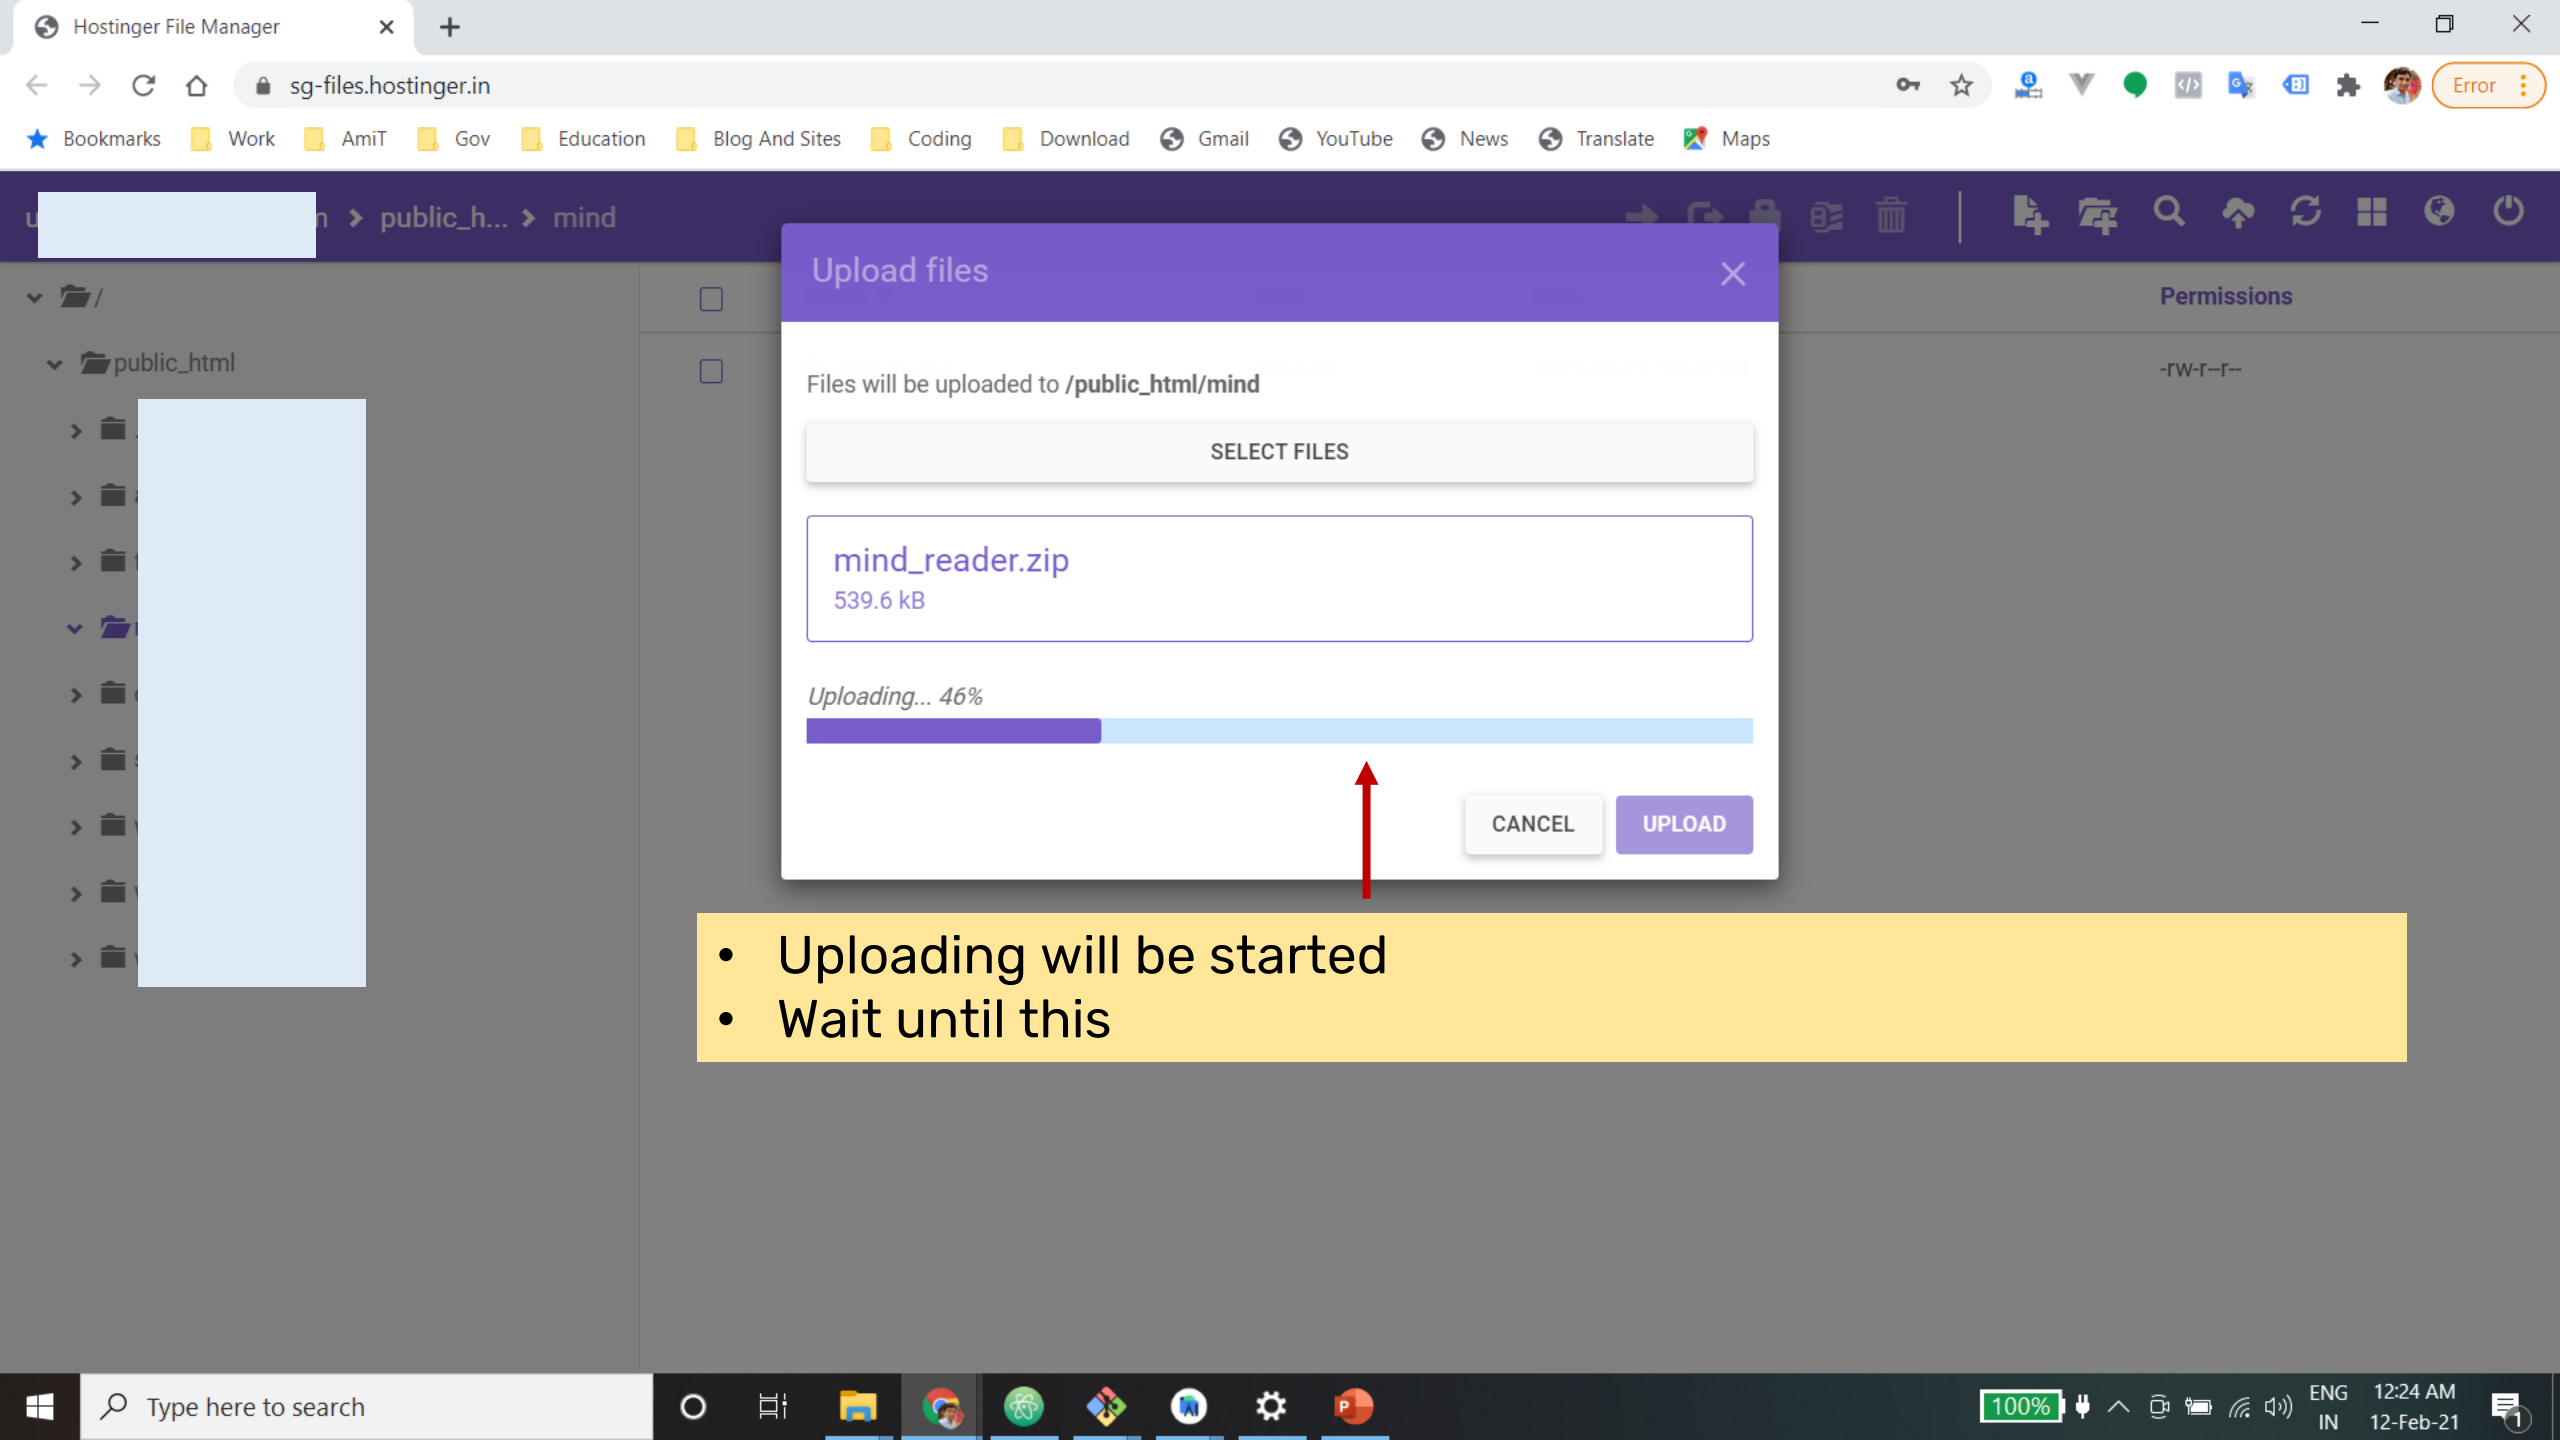

mind_reader.zip

539.6 kB

CANCEL

EXTRACT

- Change directory to /
- And click on Extract button

- Files will be extracted

MindReader

For next some minutes, I am going to **CONTROL YOUR THOUGHTS!** Are you ready?

MindReader: a machine who can supposedly discern what another person is thinking.

Yes! Show Me How...

- **Now check by opening your domain**

make every attempt to clearly state and show all proof. We do not sell your email or any information. Can Spam compliant.

Thank you!
